*Spaggiari items are NOT original but interchangeable. References to other manufacturers by their company names, trademarks or product references are for the item identification purposes and adaptability OF SPAGGIARI'S SPARE PARTS with such products and does not indicate that Spaggiari has received approval from or the authorization of such third parties to produce or distribute such products. Trademarks, company names and product (not Spaggiari), are property of their respective owners and used in compliance to art. 21 clause 1 c) CPI.

*I prodotti Spaggiari sono parti di ricambio adattabili. Qualsiasi riferimento ad altri nomi di produttori originali, marchi e nomi di prodotti originali o riferimenti è da intendersi ai fini di identificare la compatibilità della parte di ricambio Spaggiari con detti prodotti e non implica che Spaggiari abbia ricevuto l'approvazione o autorizzazione da detti produttori originali a produrre e distribuire detti prodotti. Marchi e nomi di prodotti non Spaggiari, sono da intendersi proprietà degli stessi ed utilizzati come solo riferimento in conformità Art. 21 comma 1 c) CPI.

MADE IN ITALY

Quality since 1953

Spaggiari Industria Gomma is located in the heart of Emilia Romagna.

The experience acquired in 70 years has placed Spaggiari in the fore on both the national and international scene as a benchmark in processing and supplying rubber products.

Our company is the leading producer at world-wide level as far as concerns the range of products for the dairy industry.

solutions

Spaggiari Industria Gomma es una empresa italiana ubicada en el corazón de la región Emilia Romagna.

La experiencia y competencia maduras en 70 años de actividad, han llevado a Spaggiari a afirmarse en el panorama nacional e internacional como punto de referencia en la producción y suministro de componentes de caucho.

Somos el primer fabricante a nivel mundial por la extensa gama de productos de caucho destinados a la zootecnia.

Spaggiari Industria Gomma - это итальянская компания, расположенная в самом сердце Эмилии Романьи.

Опыт и умение, накопленные за 70 лет работы, позволили Spaggiari занять лидирующую позицию на национальном и международном рынке в области обработки и поставки изделий из резины.

Мы являемся первыми в мире производителями, занимающими это место по полноте диапазона резиновых изделий для зоотехники.

CERTIFICATIONS CERTIFICACIONES ПОЛУЧИЛИ

The certification states that the company's quality management system is in compliance with ISO 9001.

La certificación ISO 9001 demuestra que el sistema de gestión de calidad de la empresa ha sido reconocido de conformidad con un estándar de excelencia.

Сертификация ISO 9001 подтверждает, что система управления качеством предприятия была признана соответствующей высокому стандарту.

Products in compliance with BfR European Standards (Chap. XXI, cat. 3).

Producto conforme con la Normativa Europea BfR (Cap. XXI, cat. 3).

Продукция соответствует европейским стандартам BfR (Гл. XXI, кат. 3)

made in italy

100%

Products in compliance with (EC) N° 1935/2004, (EU) N° 10/2011 Standards.

Producto conforme con la legislación Europea.

Продукция соответствует требованиям европейского законодательства.

Products in compliance with FDA CFR 21 Standard 3A (USA).

Material producido plenamente conforme con la normativa FDA (USA)

Материал произведен в полном соответствии с американским стандартом FDA

Material suitable for contact with food-stuffs in accordance with the EC Regulation no. 1935/2004 of the European Parliament and of the Council dated 27 October 2004.

Material adecuado al contacto con productos alimentarios según el Reglamento (CE) nº 1935/2004 del Parlamento europeo y del Consejo del 27 de octubre de 2004.

Материал пригоден для контакта с пищевыми продуктами, в соответствии с регламентом (CE) № 1935/2004 Европейского Парламента и Совета, от 27 октября 2004 года.

TIMEPRO®

MADE IN ITALY

**1.000 HOURS
OR 3.000
MILKINGS**

TIMEPRO is a technically advanced compound that guarantees an average life of 1,000 hours milking or 3,000 milkings.

TIMEPRO compuesto técnicamente avanzado que garantiza una expectativa de vida media de 1000 horas de ordeño o 3000 ordeños.

Первая технически совершенная смесь, гарантирующая ожидаемый средний срок службы 1000 часов доения или 3000 доек.

O-PURE

Externally even more resistant to the aggressive conditions found in a cowshed.

A Double internal food-grade layer, conforming to the BfR (European) and FDA (American) standards.

BfR

Spaggiari pursues the technological innovation trend and presents O-PURE, the co-extruded tube that combines the advantages of two compounds produced together. A double internal food-grade layer conforming to the BfR (European) and FDA (American) standards, externally even more resistant to the aggressive conditions found in a cowshed.

Spaggiari sigue marcando tendencia en innovación tecnológica y presenta O-PURE, la manguera coextruida que une las ventajas de dos compuestos producidos conjuntamente. Una doble capa interna apta para el contacto con los alimentos según las normativas BfR (Europea) y FDA (Americana), y externamente más resistente a las condiciones agresivas del establo.

Spaggiari продолжает технологические инновации и представляет O-PURE, коэкструдированный шланг, соединяющий в себе преимущества двух составов, производимых совместно. Двойной слой, внутренний полностью подходящий для контакта с пищевыми продуктами, согласно нормативам BfR (Европа) и FDA (США), и наружный более устойчивый к агрессивным условиям среды в коровнике

NO PHTHALATES
IN COMPLIANCE WITH REACH- SVHC LIST

Spaggiari does not use phthalates

Spaggiari no utiliza ftalatos

Spaggiari не применяет фталаты

The presence of our trademark certifies that the design and implementation comply with the EU directives 2002/72/EC and 76/769/EC regarding the restriction of using polyvinyl chloride (PVC), vinyl chloride and mixes of PVC and 7P phthalates.

La presencia de nuestra marca certifica que el proyecto y la realización cumplen con las directivas de la UE 2002/72/CE y 76/769/CE sobre la restricción en el uso de cloruro de polivinilo (PVC), cloruro de vinilo y de mezclas de PVC y ftalatos 7P.

Наш логотип удостоверяет, что проектирование и изготовление производилось в соответствии со стандартами UE 2002/72/CE и 76/769/CE, касающимися ограничения применения поливинилхлорида (ПВХ), винилхлорида и смесей ПВХ и фталатов 7P.

MADE IN ITALY

The average life for silicone teats is 1.500 hours or 5.000 milkings.

To ensure optimal performance of the silicone liners we highly recommend using plastic shells and claws so as to minimise the risk of teats being slashed and slit because of the inaccurate finish of the stainless steel materials.

La vida media de las tetinas de silicona es de 1.500 horas o 5.000 ordeños.

Para una óptima prestación de las pezoneras de silicona, aconsejamos vivamente el uso de casquillos y colectores de plástico para reducir los riesgos de corte y laceración de las tetinas debido a los acabados aproximativos de los materiales de acero inoxidable.

Средний срок службы соски из силикона составляет 1.500 часов или 5.000 доек.

Для оптимальной работы силиконовой сосковой резины мы рекомендуем использование стаканов и пластиковых коллекторов, чтобы минимизировать риск порезов и повреждения сосок, в связи с плохой обработкой материалов из нержавеющей стали.

**1.500 HOURS
OR 5.000
MILKINGS**

Silicone, gentle performance.

Silicona, delicadamente prestacional.

СИЛИКОН, ДЕЛИКАТНЫЙ И ДЕЙСТВЕННЫЙ.

Silicone liners guarantee:

- extremely gentle milking thanks to the softness of the material
- a hygienic composition
- washing and sanitising at high temperatures: $>100^{\circ}\text{C}$.

Las pezoneras de silicona ofrecen:

- Un ordeño muy delicado, dada la suavidad del material
- Una formulación higiénica.
- Un lavado y sanitización a temperaturas elevadas $>100^{\circ}\text{C}$.

Силиконовая сосковая резина позволяет:

- Производить деликатную дойку, благодаря мягкости материала
- Обеспечивать гигиену.
- Мойка и стерилизация проводятся при высокой температуре $>100^{\circ}\text{C}$.

LINERS ACCESSORIES

ACCESORIOS PEZONERAS

АКСЕССУАРЫ ДЛЯ СОСКОВОЙ РЕЗИНЫ

Glass. The flow of milk between the short liner and milk tube can be seen through the viewer or glass.

Vaso. El visor o vaso permite visualizar el deslizamiento de la leche entre la pezonera corta y el manguito de la leche.

Стаканчик. смотровое устройство или стаканчик позволяет смотреть за течением молока между короткой сосковой резиной и молочной трубкой.

Protector. The protector safeguards the part of the teat subject to greatest chemical stress and from being trod on by the cows. The inner conical section makes it adaptable to the majority of liners on sale.

Protector. El protector protege una de las partes de la tetina sometida a mayor estrés químico y pisadas por parte de las vacas. La sección cónica interna le permite adaptarse a la mayoría de pezoneras existentes en el mercado.

Протектор. протектор защищает одну из частей соски, подверженную наибольшему химическому воздействию и наступанию ногами коров. Внутренняя коническая часть делает его адаптируемым к большинству видов имеющейся в продаже сосковой резины.

Stopper. Element that substitutes the udder when it cannot be used.

Stopper. Elemento que sustituye el pezón cuando éste no se puede utilizar.

Стопор. Элемент, заменяющий сосок, когда его нельзя использовать.

OIL VACUUM PUMP

BOMBAS DE VACÍO DE ACEITE

ВАКУУМНЫЕ МАСЛЯНЫЕ НАСОСЫ

NOTE:

- The PV pumps called "ONLY PUMP" are supplied only with pump, holding feet and oil brass nozzles
- PV (Vacuum Pumps) pumps "complete" are supplied with pulley, oiler, silencer, inlet manifold and non-return valve
- GPV (Group Vacuum Pump) pumps on base plate or bracket are supplied with everything
- GPV (Group Vacuum Pump) pumps without electric motor are supplied with everything except for the motor but they do have the motor pulley and the belt.
When you make the order please specify the motor you are going to use with the pump in order to supply the right pulley. GPV 3300/2200 has oil/air separator and fan included
- Vacuum tanks are completely made in hot galvanized steel. The pumps are mounted on unvibrant brackets. On GPV 1500/1000/750/500 the separator is not included
- All the pumps follow EE C rules and have an instruction manual included inside the pump
- On each pump and on the manual you will always find a serial number, the model and the date of construction (useful for the guarantee)
- There is one year guarantee from the date printed on the manual and on the EE C label. The guarantee does not include faults due to a wrong installation or from using the pump for different purposes. Guarantee is limited to reparation or replacement of the defected spare part. Any case, the responsibility for secondary damages depending from stopping the machine is not included. All the electric parts are excluded from guarantee.
- A II the GPV on vacuum tank has an internal filter included
- Vacuum tank exits: lt. 65 2"-63 mm – lt. 85 3"-90 mm – lt. 110 4" – 110 mm

ANOTACIONES:

- Las bombas PV NUDE incluyen únicamente la bomba, los pies de soporte y las boquillas de latón para el aceite.
- Las bombas PV (solo bomba de vacío) incluyen polea, engrasador, silenciador, manguito de entrada y válvula de retención.
- Los GPV (grupo de bomba de vacío) de banco o de tanque incluyen todos los componentes.
- Los GPV (grupo de bomba de vacío) sin motor incluyen todos los componentes excepto el motor; se suministran junto con la polea de motor y la correa de transmisión. Al realizar el pedido de GPV sin motor, es necesario especificar el tipo de motor que se instalará, a fin de proporcionar la polea correcta.
- En GPV 3300/2200 se incluye el separador de aceite/aire y el ventilador.
- Los tanques están fabricados enteramente en acero galvanizado en caliente. Las bombas están montadas sobre bases antivibratorias. Para GPV 1500/1000/750/500, el separador es un suplemento.
- Todas las bombas de vacío cumplen con la norma CEE y se acompañan de un manual de uso que encontrará en el interior de la máquina. - En las bombas y en el manual se indica el número de serie, el modelo y la fecha de fabricación (importante para la garantía).
- La garantía tiene una validez de un año a partir de la fecha del manual y de la fecha indicada en la etiqueta CEE. La garantía no cubre defectos causados por una instalación incorrecta o un uso diferente al previsto. La garantía se limita a la reparación o sustitución de la pieza defectuosa. En cualquier caso, se excluye la responsabilidad por daños accesorios que puedan depender del tiempo de inactividad de la máquina. Todas las piezas eléctricas están excluidas de la garantía.
- Todos los GPV de depósito incluyen filtro interno.
- Salidas depósitos: L 65 2"-63 mm – L 85 3"-90 mm – L 110 4" – 110 mm

ПРИМЕЧАНИЯ:

- Насосы PV NUDE представляют собой только совокупность из насоса, опорных ножек и латунных масляных патрубков.
- Насосы PV (только вакуумный насос) включают шкив, масленку, глушитель, впускной патрубок и обратный клапан.
- GPV (группа вакуумных насосов) на полке или баке, которые входят в комплект поставки
- GPV (группа вакуумных насосов) без двигателя, в комплекте со всем, кроме двигателя, включает шкив двигателя и приводной ремень. При заказе ОТС без двигателя необходимо указать тип двигателя, который будет установлен, для того, чтобы поставить подходящий шкив
- Масловоздушный сепаратор и вентилятор входят в комплект поставки GPV 3300/2200.
- Резервуары полностью изготовлены из горячеоцинкованной стали. Насосы установлены на антивибрационных кронштейнах. Для GPV 1500/1000/750/500 сепаратор является дополнительной опцией
- Все вакуумные насосы соответствуют стандартам ЕЕС и сопровождаются руководством пользователя, которое находится внутри машины - Серийный номер, модель и дата изготовления указаны на насосах и в руководстве (важно для гарантии)
- Гарантия действительна в течение одного года с даты руководства и даты, указанной на этикетке ЕЕС. Гарантия не распространяется на дефекты, вызванные неправильной установкой или использованием не по назначению. Гарантия ограничивается ремонтом или заменой неисправной детали. В любом случае исключается ответственность за повреждение принадлежностей, которое может быть вызвано простоем машины. Гарантия не распространяется на все электрические детали.
- Все GPV на танке включены с внутренним фильтром
- Объем бака: л. 65 2"-63 мм - лт. 85 3"-90 мм - лт. 110 4" - 110 мм

SOCK FILTERS - SLEEVE FILTERS

FILTROS DE MALLA

РУКАВНЫЕ ФИЛЬТРЫ

For a minimum batch, the sock filters can be made in all sizes

A partir de un lote mínimo, se pueden fabricar los filtros envolventes en todas las medidas

На условиях минимальной партии чулочные фильтры могут быть изготовлены в любых размерах

The sock filters for milk have been conceived and created with materials developed specifically for filtering milk. By using robotised machines for production we can guarantee a millimetric precision seam that ensures excellent resistance to breakage even when pressures are very high.

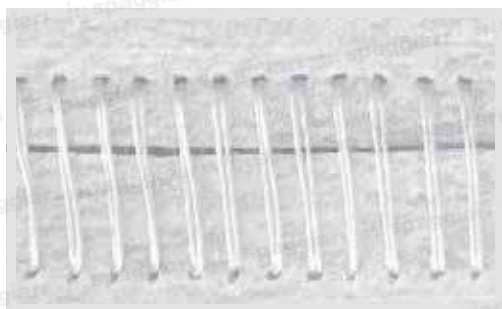

Los filtros de malla para leche se han concebido y fabricado con materiales desarrollados expresamente para el filtrado de la leche. Su fabricación realizada con máquinas robotizadas ofrece una costura con precisión milimétrica que garantiza una óptima resistencia a la rotura incluso a altas presiones.

Рукавные фильтры были разработаны и изготовлены из специальных материалов для фильтрации молока. Обработка при помощи роботизированных машин позволяет очень точное шивание, с точностью до миллиметра, чтобы гарантировать повышенную прочность к разрывам, даже при высоком давлении.

Use and maintenance: how to keep your milking liners perfect

Uso y mantenimiento: cómo mantener las pezoneras en perfecto estado

Использование и уход: как сохранить сосковую резину в идеальном состоянии

Instructions:

- Check for shells and claws, which must not show sharp sides that can damage the liner's wall.
- Check for any foreign objects inside the liner and soak them in hot water for a few minutes.
- Fit the liner inside the shell and pull hard. For the "long" liners (with tail) make sure that the indicators are aligned in position on the same vertical axis, thus preventing twisting of the liner inside the shell.

Instrucciones:

- Compruebe que los protectores para pezoneras y los colectores no presenten partes afiladas que puedan dañar la pared de la pezonera.
- Compruebe si hay cuerpos extraños en el interior de las pezoneras y sumérgalas en agua caliente durante algunos minutos.
- Coloque la pezonera en el interior del tubo y tire con fuerza. Para las pezoneras «largas» (equipadas con tubo de leche), asegúrese de que los indicadores de posición estén alineados sobre el mismo eje vertical, evitando de este modo la torsión de las pezoneras en el interior del protector.

Инструкции:

- Убедитесь, что стаканы и коллекторы не имеют острых частей, которые могут повредить стенку сосковой резины.
- Проверьте наличие инородных тел внутри сосковой резины и погрузите ее в горячую воду на несколько минут.
- Поместите сосковую резину внутрь стакана и сильно потяните. Для «длинной» резины (включающую часть молочной трубки) убедитесь, что индикаторы положения выровнены по одной вертикальной оси, что позволяет избежать перекручивания резины внутри стакана.

Suggestions:

- Every day, check the regular use and proper cleaning of the products in use.
- Avoid combinations of different detergents, highgrade acid detergent.
- Cleaning products left for an extended period of time may damage the material.
- Store products in a cool, dry place away from direct sunlight, heat and corrosive substances.

Recomendaciones:

- Compruebe diariamente el uso correcto y la limpieza adecuada de los productos en uso.
- Evite combinaciones de productos de limpieza diferentes, así como limpiadores de alta graduación ácida.
- Dejar los productos de limpieza en contacto con la pezonera durante tiempos prolongados favorece la corrosión del material.
- Conserve los productos en un lugar fresco, seco, lejos de la luz solar directa, de fuentes de calor o de sustancias corrosivas.

Советы:

- Ежедневно проверяйте регулярность использования и правильную очистку используемых продуктов.
- Избегайте комбинаций различных чистящих средств, моющих средств с высоким содержанием кислоты.
- Моющие средства, находящиеся в течение длительного времени в контакте с сосковой резиной, способствуют коррозии материала.
- Храните продукты в прохладном, сухом месте, вдали от прямых солнечных лучей, источников тепла, агрессивных веществ.

IMPORTANT

In case of inappropriate use of spare parts the warranty provided by Spaggiari Industria Gomma srl shall not be effective.

IMPORTANTE

En caso de uso inapropiado de las piezas de repuesto, la garantía Spaggiari Industria Gomma no será aplicable.

ВАЖНО

В случае ненадлежащего использования запасных частей гарантия Spaggiari Industria Gomma - не действительна.
